

Creativa (i-Lance) — Session 5

Client-Ready Freelance Launch Pack | Front-End Development

Freelancer: Mai Salama | **Target platform:** Upwork

1. My Real Opportunity & Client Brief Analysis

Selected opportunity: “**Frontend Developer Needed – Build a Modern, High-Quality Web Experience**”. The job is listed on Upwork as a worldwide, ongoing, part-time front-end opportunity. The client needs a modern web experience with responsive layouts, UI polish, and smooth performance across devices. The post requires JavaScript and HTML5, with CSS/HTML also relevant.

Opportunity URL: [Open the Upwork job posting](#)

Platform / Channel	Upwork — Freelance Jobs
Opportunity Title	Frontend Developer Needed – Build a Modern, High-Quality Web Experience
Client Need	A polished front-end experience with responsive layouts, better UI quality, and reliable performance across devices.
Desired Outcome	A modern, maintainable interface that works smoothly on desktop, tablet, and mobile.
Deliverables	Responsive front-end pages, UI improvements/polish, clean implementation, and performance-focused refinements.
Required Skills	JavaScript, HTML5; CSS and HTML are also relevant to the role.
Budget	\$10 fixed price as posted in the opportunity.
Timeline / Commitment	Part-time and ongoing project; the post does not state a fixed completion deadline.
Client Expectations	Clean work, reliable delivery, strong UI quality, responsive behavior, and smooth performance.
Missing Information to Ask	Number of pages/screens, design source (Figma or existing site), exact content/assets, acceptance criteria, API/integration needs, and milestone expectations.

Why this opportunity fits: The requested core technologies and front-end responsibilities align directly with a junior front-end service focused on HTML, CSS, JavaScript, responsive design, and UI implementation.

Opportunity check: This is a real Upwork listing found on September 8, 2026. The job should still be checked on Upwork immediately before submission because status and availability can change.

2. My Freelance Service & Profile Readiness

Service Title: Responsive Front-End Website Development with HTML, CSS & JavaScript

Target Client: Startups, small businesses, agencies, and product teams that need clean, responsive web interfaces or front-end improvements.

Countable Deliverables:

- 1 responsive website page or a defined front-end task based on the client's provided requirements.
- Mobile, tablet, and desktop responsive layout.
- Semantic HTML5 structure and organized CSS.
- JavaScript interactions required by the agreed scope.
- Basic cross-browser testing and UI refinement.
- Clean, organized source code ready for client review.

What Is Included: Front-end implementation, responsive styling, UI refinement, basic JavaScript interactions, debugging, and final testing within the agreed scope.

What Is Not Included: Backend development, database work, paid third-party services, advanced React/Next.js development, or major redesigns outside the agreed scope unless separately quoted.

Delivery Time: 2–3 days for a small, clearly defined front-end task; larger scope requires a revised estimate after reviewing the requirements.

Starting Price: \$10 for the selected opportunity because it matches the client's posted fixed budget. For future projects, the price should be adjusted to the actual scope.

Relevant Proof: Responsive web projects and front-end practice work using HTML, CSS, JavaScript, Bootstrap, DOM manipulation, and responsive design. A live portfolio link should be attached to the final application.

Profile Positioning: Junior Front-End Developer focused on clean, responsive, user-friendly interfaces and dependable communication.

Profile Summary

I am a Front-End Developer focused on building clean, responsive, and user-friendly web interfaces. I work with HTML5, CSS3, JavaScript, Bootstrap, and responsive design principles. I pay close attention to layout consistency, usability, mobile responsiveness, and clean code. I am comfortable turning requirements into polished front-end pages and improving existing interfaces through careful testing and refinement.

Service-to-Opportunity Match: Strong match for HTML5/JavaScript/CSS-based front-end work. The client's request for responsive UI and performance-focused polish is directly addressed by the service package above.

3. Tailored Client Proposal

Proposal — Ready to Customize and Submit

Hi,

I'd be happy to help build and polish your front-end experience. Your project stood out to me because it focuses on responsive layouts, UI quality, and smooth performance across devices — exactly the type of front-end work I enjoy.

I can help with:

- Building clean, responsive layouts for desktop, tablet, and mobile.
- Implementing and refining the UI with HTML5, CSS, and JavaScript.
- Improving spacing, consistency, usability, and visual polish.
- Testing the interface across common screen sizes and browsers.
- Keeping the code organized, readable, and easy to maintain.

For the initial scope, I can complete the agreed front-end task within **2–3 days**. I am also open to continuing with additional improvements if the collaboration goes well.

Before starting, I would like to confirm the exact number of pages/screens, whether designs are available in Figma, the required content/assets, and any API or integration requirements. This will allow me to confirm the final scope and delivery plan.

My proposed price for the opportunity is **\$10 fixed**, matching the posted budget for the initial task.

I'm ready to start once the requirements are confirmed. Thank you for considering my application.

Best regards,

Mai Salama

Front-End Developer

Why This Proposal Is Client-Focused

- Starts with the client's stated needs instead of a generic biography.
- Names concrete deliverables and testing activities.
- Matches the posted budget and avoids promising unsupported results.
- Asks focused questions only where the job post is incomplete.
- Ends with a clear next step: confirm scope and start.

Evidence note: Do not claim a framework, paid experience, client history, or result that is not true. Add only real portfolio links and genuine experience before submitting.

4. 45–60 Second Client Pitch

Video Pitch Script

Hello, I'm Mai, a Front-End Developer. I'm interested in your project because you're looking for someone who can create a modern, responsive web experience and make sure the interface feels polished across different devices.

I work with HTML5, CSS, JavaScript, and responsive web design, and I focus on clean structure, consistent UI, and a smooth user experience. For your project, I can help turn the requirements into responsive front-end pages, refine the interface, and test the result across desktop, tablet, and mobile screens.

For the initial scope, I can work within the posted \$10 budget and aim to complete a clearly defined task within 2–3 days. Before starting, I'd just confirm the exact screens, designs, content, and any integrations you need.

I'd be happy to discuss the details and get started. Thank you for your time.

Recording checklist:

- Keep the video between 45 and 60 seconds.
- Use a quiet, well-lit place and clear audio.
- Speak naturally; do not read too quickly.
- Mention the client's project, your matching skills, your delivery plan, and the next step.
- Upload the final video to Google Drive and set access to "Anyone with the link — Viewer."

Video link: *Insert the open Google Drive link after recording the pitch.*

Application Readiness — Final Checklist

Item	Status	Action / Evidence
Opportunity URL	✓	Upwork link included and clickable.
Service	✓	Clear title, target client, deliverables, inclusions/exclusions, price and delivery.
Proposal	✓	Tailored to the exact opportunity and budget.
Pitch	✓	Client-focused 45–60 second script prepared.
Portfolio Proof	■	Add only real live project links before submission.
Video Evidence	■	Record and add the open Google Drive link.
Final Scope Check	✓	Confirm page count, designs, content, integrations and acceptance criteria.

5. Submission-Ready Application Page

Selected Opportunity: Frontend Developer Needed – Build a Modern, High-Quality Web Experience

Platform: Upwork | **Budget:** \$10 Fixed | **Type:** Part-time / Ongoing

Client: Worldwide posting; the job page lists the client in Perth, Australia and shows an established Upwork account with prior hires.

Application Message:

Hi, I'd be happy to help build and polish your front-end experience. I can create clean, responsive layouts using HTML5, CSS, and JavaScript, improve UI consistency, and test the result across desktop, tablet, and mobile devices. I focus on readable code, responsive behavior, and a polished user experience.

For the initial scope, I can work within the posted **\$10 fixed budget** and target a **2–3 day** turnaround for a clearly defined task. Before starting, I'd confirm the exact screens, design files, content/assets, and any API or integration requirements so the scope is clear.

I'm available to start once the requirements are confirmed and would be glad to continue with further improvements if the collaboration is a good fit.

Best regards,

Mai Salama

Front-End Developer

Links & Evidence

Job URL: [Open the exact Upwork opportunity](#)

Portfolio: Add a real live project/GitHub link before submission. Do not add a link unless it is accessible and belongs to the freelancer.

Video Pitch: Add the Google Drive open-access link after recording the 45–60 second pitch.

Final verification before uploading: Open the PDF yourself, click the opportunity link, confirm the service/proposal/price/pitch all refer to the same opportunity, and make sure any portfolio and video links are publicly accessible.

Prepared as a maximum-5-page client-ready launch pack for Creativa (i-Lance) — Freelancing Skills Track, Session 5.
